

Luke Slater – www.lukeslater.com

One of Britain's true electronic music and Techno pioneers. A career that has spanned 20 years and counting, from early DJ sets back in 1988 and his first release "Freebase" in 1989 through to his new Planetary Assault Systems album due for release 2009 Luke Slater continues to reinvent himself and push musical boundaries.

His regular appearances at legendary clubs as Berghain Berlin, Fabric London and Nitsa Barcelona retain his superstar status today as a live performer and of course a DJ prepared to deliver 5 hour sets to sell out crowds.

Luke also took the time to set up Mote Evolver back in 2006. A label run by himself releasing limited 12" copies for the collector and digital downloads through the Mote Evolver website.

After a hectic 20 years 2007/2008 saw Luke Slater slow things down a little to recharge his batteries and is now focused more than ever for the next phase in his career. Expect DJ sets in YOUR city, new releases, remixes and of course the eagerly anticipated New Planetary Assault Systems album due for release in 2009.
